SUMMARY

Dynamic Senior Web Developer with 5 years of experience in web application architecture and development. Engineered a responsive survey platform for the National Safety Council using React.js, resulting in robust data security. Spearheaded the development of advanced analytics dashboards with Vue.js, enhancing real-time data visualization. Seeking opportunities to leverage expertise in Node.js and cloud deployment to drive innovative web solutions through cutting-edge technologies and cross-functional collaboration.

EXPERIENCE

Senior Web Developer

Canopus GBS

December 2021 - Present, Bengaluru, Karnataka

- NSC Survey Tool (React.js): Engineered a complex, responsive survey platform for the National Safety Council (NSC) using React.js and TypeScript; architected sophisticated role-based routing and access restrictions to ensure data security and maintainable code architecture.
- Vega Analytics Platform (Vue.js): Spearheaded the development of a high-performance dashboard using Vue.js, Vue Router, and Axios; integrated Apex Charts and Chart.js for advanced data visualization and consumed RESTful APIs for real-time analytics.
- ATS Tool (Vue.js 3): Designed and implemented an end-to-end Applicant Tracking System using Vue.js 3 and Material UI; developed the backend architecture with Node.js and Express.js, utilizing MySQL for efficient candidate data management and tracking.
- IT Amigo Diageo (React.js): Architected and deployed high-performance, responsive seat-booking layouts and interactive UI components using React, Bootstrap, and JavaScript. Focused on optimizing frontend performance and cross-device compatibility to improve workspace management efficiency for global stakeholders.
- Fullstack Integration & API Design: Collaborated with cross-functional teams to integrate frontend components with Node.js and Express.js backend services; leveraged TypeScript for robust type safety and optimized MySQL database queries to facilitate seamless data flow.
- Triveni Turbines (Cloud Deployment): Supported and maintained the enterprise site and successfully deployed the application on AWS EC2 instances; executed MySQL database migrations to ensure data integrity and high availability.
- Technical Leadership: Mentored a team of junior developers in React and Vue.js best practices, conducting code reviews and championing the adoption of clean code principles and modern development workflows.

Software Engineering Intern

RC TECHBOX

January 2020 - February 2021, Bengaluru, Karnataka

- School Management System (MERN Stack): Contributed to the development of a comprehensive School Management System using React.js, Node.js, and Express.js; assisted in designing and implementing MongoDB schemas to manage student and faculty data structures.
- Full-stack Feature Development: Developed and tested RESTful API endpoints using Node.js to facilitate seamless data communication between the React frontend and the backend server.
- Database Integration: Gained hands-on experience in managing both relational (MySQL, PostgreSQL) and non-relational (MongoDB) databases, supporting data migration and consistency tasks.
- Real-time Functionality: Assisted in configuring Firebase services to enable real-time database updates for core CRUD operations, improving application responsiveness.
- Cloud Support: Supported the deployment of web applications on AWS and GCP environments; participated in maintaining CI/CD pipelines to streamline the development-to-production workflow.
- Automation Scripting: Utilized Python to build web scraping modules that automated data collection, integrated into dynamic website features to enhance content accuracy.
- Version Control & Collaboration: Managed complex codebases using Git and GitHub, following industry-standard branching strategies to facilitate efficient team collaboration and code maintainability.

EDUCATION

B.E Computer science and Engineering

SEA College of Engineering and Technology • Bangalore • 2017

PUC (PCMC)

Lowry Memorial PU College • Bangalore • 2011-2013

S.S.L.C

New Baldwin High School • Bangalore • 2010-2011

AWARDS & HONORS

Star Performer Award

Canopus GBS • 2025

- The **Star Performer Award (2025)** validates my dual impact as a technical lead and project driver . It recognizes my ability to manage multiple complex workstreams simultaneously, ensuring all deliverables are met within strict timelines without compromising code quality. Furthermore, it highlights my success in mentoring junior developers to build scalable solutions, proving I can elevate team performance to meet critical business goals.
-

SKILLS

Frontend: React.js, Vue.js (2 & 3), TypeScript, JavaScript (ES6+), HTML5, CSS3.

Backend: Node.js, Express.js, Python.

Database: MySQL, PostgreSQL, MongoDB, Firebase (Real-time DB).

UI Frameworks: Material UI, Vuetify, Bootstrap.

Cloud: AWS (EC2), GCP, Git/Bitbucket, CI/CD Pipelines, Linux.

Tools: Axios, Apex Charts, Chart.js, Web Scraping (Python), and Manual Testing.
